

RELIANCE T.U.P XII · ELIMINATION ROUND

JioMausam

*We don't build sensors.
We become the sensor.*

A live, street-level weather map from Jio's own network, and insurance that pays workers automatically when extreme weather stops their work.

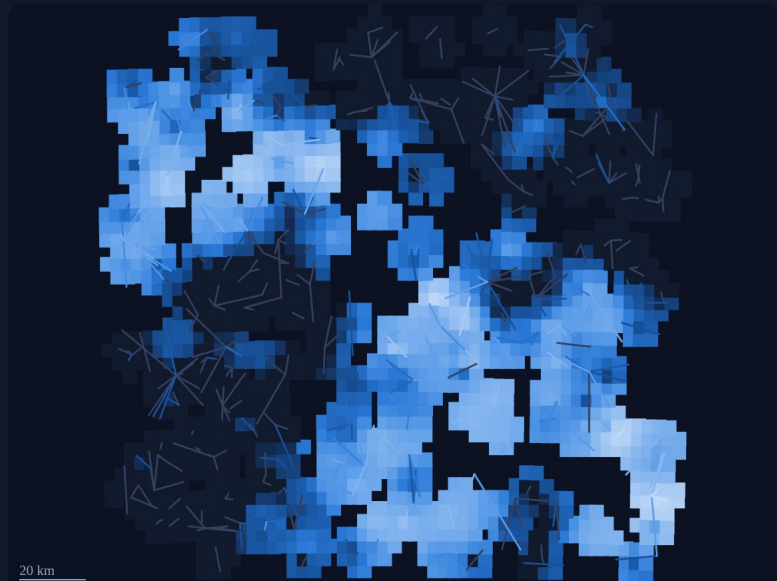

OUR WORKING PROTOTYPE

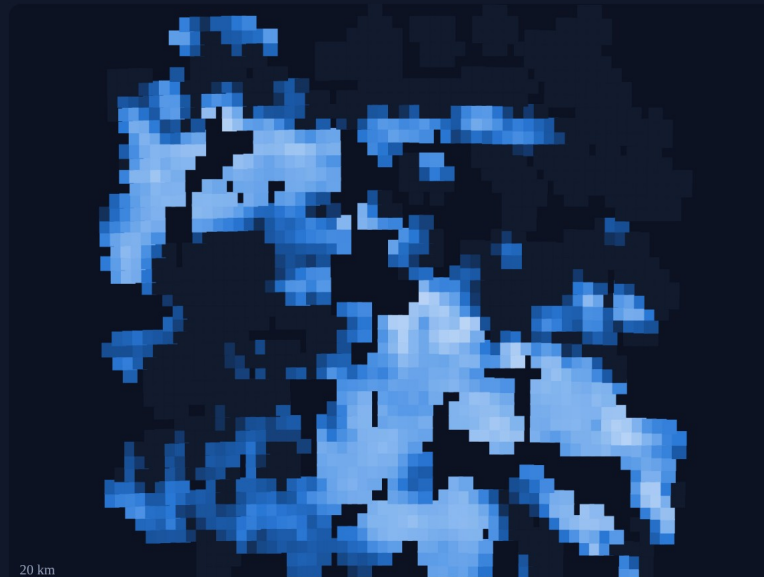

Same storm. Our network vs a radar.

JioMausam: rain from 500 network links

Each line is one tower-to-tower link, coloured by the rain it measured. The field between links is interpolated.

**Reference: national weather radar**

What a ₹-crore Doppler radar saw over the same area at the same moment.

500

real tower-to-tower microwave links, 1-minute signal data

0

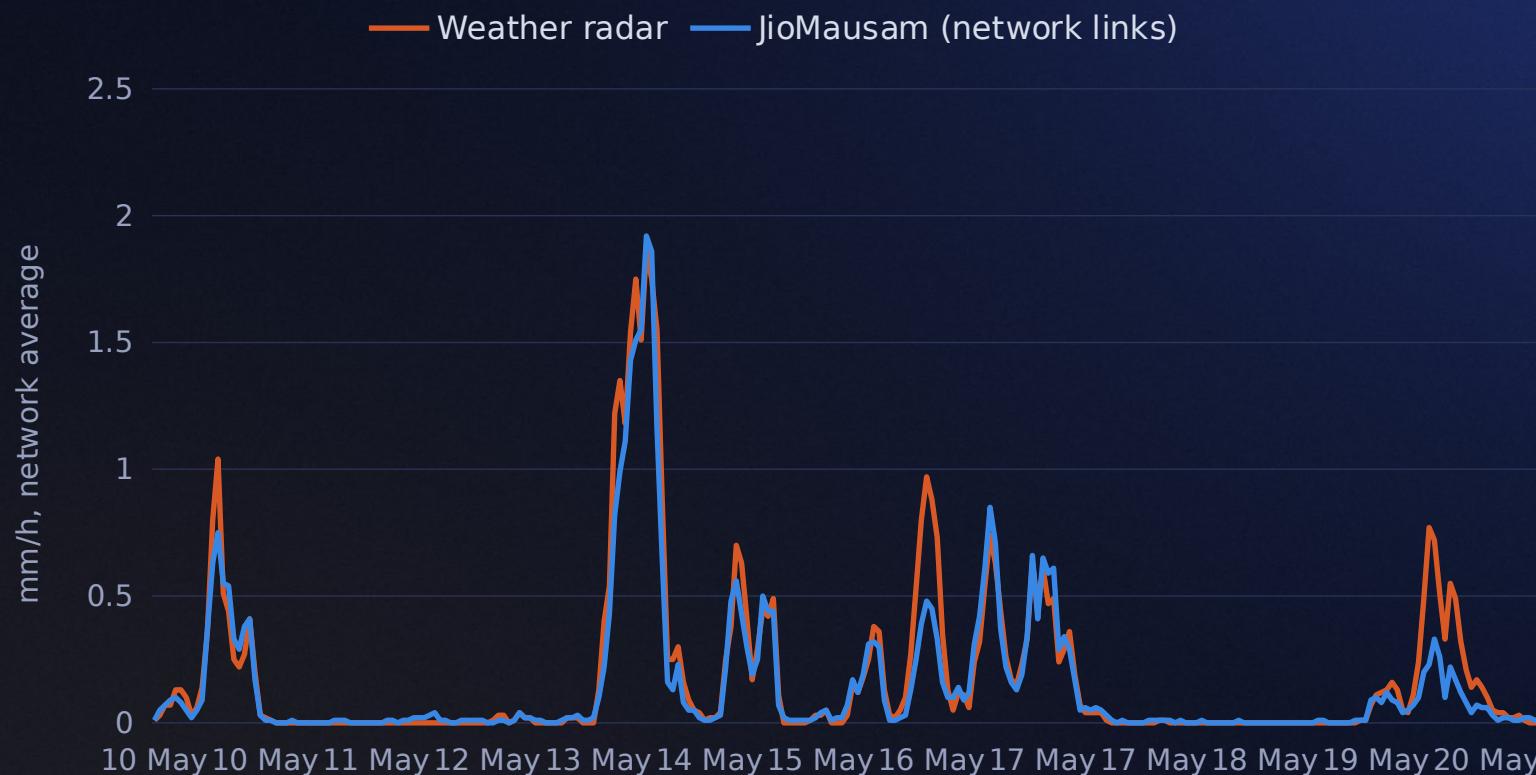

radars, weather stations or new hardware on our side

[Open the live prototype to replay the storm](#)

THE PROOF

Tested on days it had never seen.

0.95

network-wide match with radar,
hour by hour

0.88

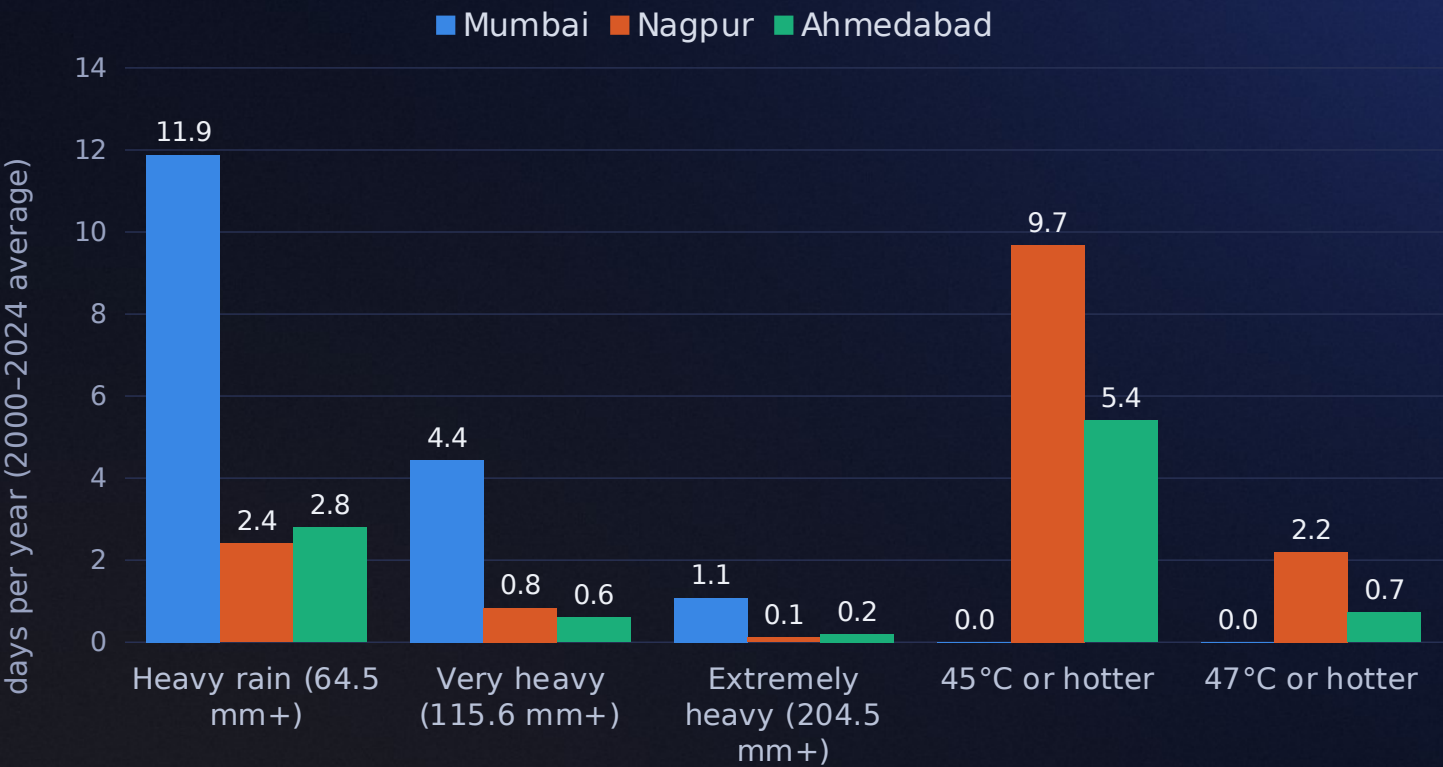

typical single link on its own

91%

of rainy days caught, 4.6% false
alarms

Indian weather changed our pricing.

One flat price can't work.

Mumbai's risk is rain. Nagpur's and Ahmedabad's is heat. So each city is priced on its own 25-year record.

Mumbai extremely heavy rain day **₹45/mo**

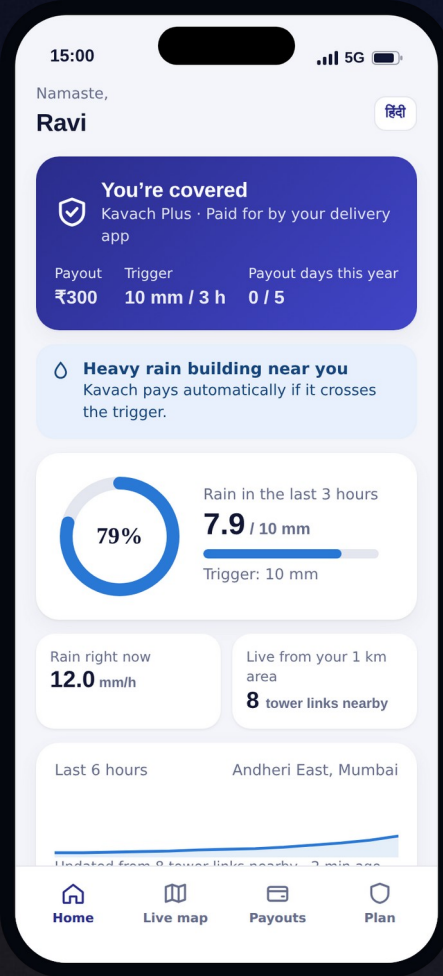

Nagpur 47°C day **₹52/mo**

Ahmedabad 47°C day **₹29/mo**

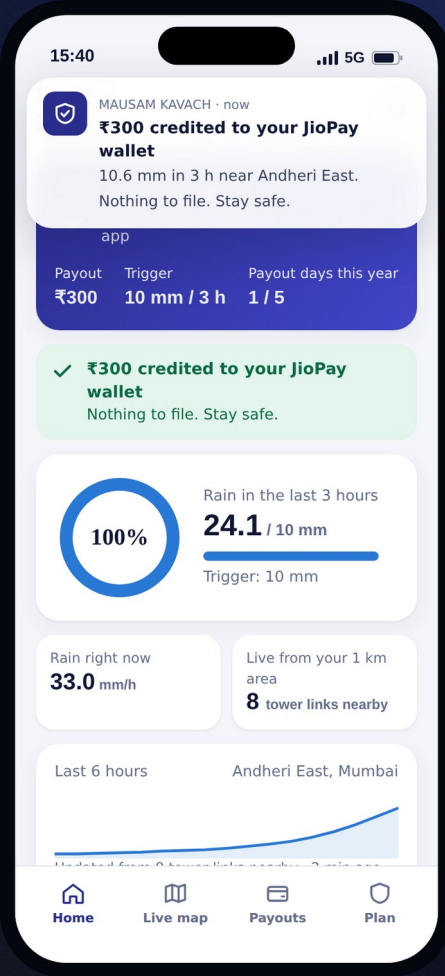

THE PRODUCT

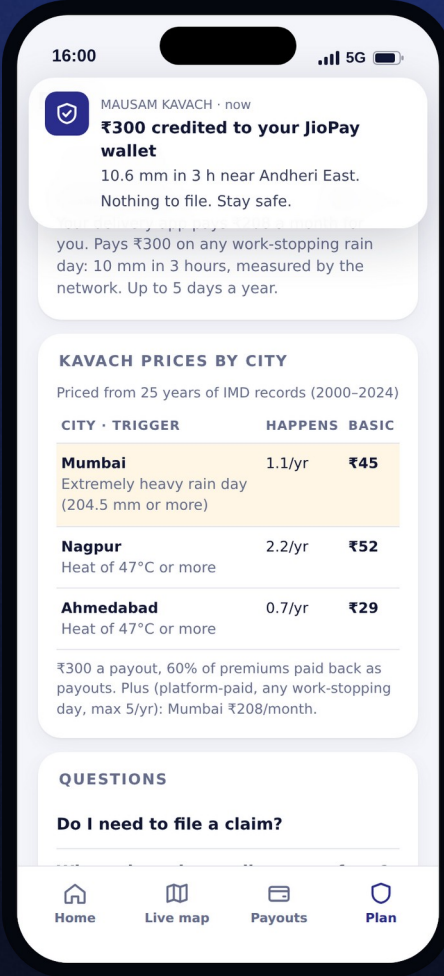

What a worker actually sees.

1 Covered from their recharge. The ring fills as rain builds.

2 The network crosses the trigger. ₹300 lands in JioPay.

3 City prices, set from 25 years of IMD records.

THE BUSINESS

Three ways it pays.

₹174 Cr

a year in premiums if 1% of Jio's 500M users buy Kavach Basic at ₹29 a month

Near-zero cost to acquire (it rides on the recharge) and zero cost to settle (payouts are automatic).

Kavach Basic

Individuals add it at recharge. ₹29-52 a month, priced city by city.

Kavach Plus

Delivery apps buy it for riders: ₹208 a rider a month in Mumbai. 50,000 riders ≈ ₹12.5 Cr a year.

Data + customer zero

Insurers and state disaster agencies license the map. JioMart, New Energy and Jio use it first.

WHY RELIANCE, AND OUR ASK

Only Reliance holds every layer.

Sense Jio network, lakhs of sites

Reach 500M+ users who recharge

Pay JioPay and JioFinance

Insure Jio Financial Services partners

Use JioMart, New Energy, Jio

The ask: a 90-day pilot

Rain in Vidarbha, heat in Ahmedabad.

- Link logs for two districts
- One Jio Financial Services insurance partner
- A five-person team. No new hardware.

Success: $r \geq 0.8$ against IMD gauges, 80% of heavy-rain events caught, money in wallets within 6 hours.

India won't adapt to climate change by building more.

It will adapt by listening to what it already has.
